“MAXIMIZE YOUR FUN”

EXPERTS IN WATERSPORT SINCE 2001

Since the beginning of this millennium, World Nautic Center has been active in water sports, with full dedication. From passion to expertise and always looking for the best, fastest, safest or coolest product for you! Travelling the world, testing products, having fun and above all finding out if something works, that's our challenge. With a team of dedicated experts, we ensure that we achieve our shared goal:

MAXIMIZE YOUR FUN

SEABOB

“EXPERIENCE THE SEABOB, THE ULTIMATE WATER TOY FOR ENDLESS FUN, FROM PLAYFUL MOMENTS ALONG THE SHORELINE TO THRILLING DIVES DOWN TO 40 METERS DEEP! IT’S THE PERFECT CHOICE FOR THE WHOLE FAMILY TO ENJOY TOGETHER!”

WHAT IS A SEABOB

With a SEABOB you get a fantastic water toy. SEABOBS are made in Germany and are synonymous with solidity and durability. The SEABOB designed by CAYAGO is a water toy with which you can have fun both on the waterline and underwater.

With a maximum diving depth of 40 meters, they are ideal for use in scuba diving. With a top speed of up to 22 km/h compared to the water, it is also a fantastic toy to play with on the waterline.

Due to the low weight, good manoeuvrability and ease of use, the SEABOB not only comes into its own on the open sea, but it is also the ideal toy for exploring along the coast, in a bay or in front of an island.

OFFICIAL TEST CENTER

ESURF

“FROM SAFE FUN FOR KIDS TO HIGH-SPEED THRILLS FOR ADVENTURERS, OUR VERSATILE BOARD DOES IT ALL! USE IT AS A BOAT FOR THE LITTLE ONES OR TRANSFORM IT INTO A HIGH-SPEED SURFBOARD, HITTING SPEEDS UP TO 64 KM/H! GET READY FOR THE ULTIMATE WATER EXCITEMENT!”

ESURF

The revolutionary electric surfboard.
The ESURF board for Kids - beginners and Pro riders.

Or 1 board for the whole family. Partly due to the 3 adjustable positions on the controller, you can let every user experience maximum fun.

**THE REVOLUTION IN
ELECTRIC SURFBOARDS.**

3 IN 1.

- 1: Surfboard
- 2: Etube (with this accessory you have an ESURF with tube, so the ETUBE)
- 3: Ekart (with this accessory you have an Esurf with pad thing so the EKART)
Great for the whole family!

**EKART:
EKART PAD**

Absolutely fantastic for children and adults who love karting, this accessory allows karting on the water. With the special pad to be placed on the ESURF you have a kind of elevation on the ESURF which makes sailing even easier. In short, a great accessory that makes the ESURF even more complete.

ESURF:

The heart of the ESURF has been developed by ESURF itself in the COBALT factory, where engineers have worked for years to develop an electric jet propulsion system with this power, which is unprecedented namely 20Kw. This motor is so powerful that it can effortlessly propel people weighing 120 kg.

Unprecedented performance:

Use ESURF for 45 minutes on the fastest setting and up to 115 minutes on the lowest settings. or unprecedented performance and that by the battery / accumulator developed in our own factory.

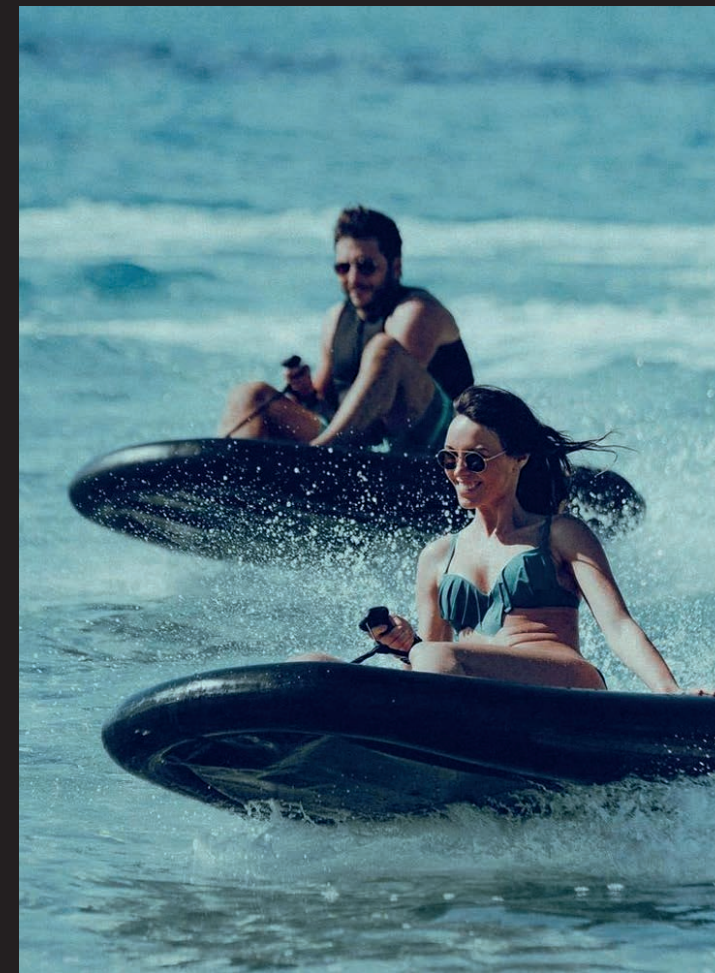

SPEED:

Flying over the water at 64 km/h, these speeds have never been achieved before on the water.

**ESURF TUBE:**

With this accessory, you can make beginners gain confidence by giving extra stability, making learning to ESURF much easier and faster. Persons up to 110 kg can use the ESURF in combination with the ETUBE.

What is also a big advantage of the ESURF with the ETUBE is that the users sail around the boat and the ETUBE also protects your boat/yacht in case of accidentally getting too close to the boat.
